Volume 206 1988

Contents

Letters to the Editor

A correlation between Balmer and soft X-ray emission from stellar and solar flares
Butler, C.J., Rodono, M., Foing, B.H. L1

Detection of a galaxy near the line of sight toward the QSO 1209 + 107
Arnaud, J., Hammer, F., Jones, J., Le Fèvre, O. L5

The micro-lensing scenario for the BL Lac object AO 235+164
Kayser, R. L8

A cross-correlation analysis of luminosity segregation in the clustering of galaxies
Alimi, J.-M., Valls-Gabaud, D., Blanchard, A. L11

The new millisecond pulsar PSR 1957+20 and neutron star equations of state
Lipunov, V.M., Postnov, K.A. L15

CO microwave emission from RV Tau variables
Bujarrabal, V., Bachiller, R., Alcolea, J., Martín-Pintado, J. L17

SEST observations of CO(1–0) emission in ultraluminous infrared galaxies
Mirabel, I.F., Booth, R.S., Garay, G., Johansson, L.E.B., Sanders, D.B. L20

Void probabilities: behaviour with depth of survey in 2D catalogs
Maurogordato, S., Lachièze-Rey, M., Bouchet, F.R. L23

The time variability of non-metastable ammonia maser lines
Wilson, T.L., Henkel, C. L26

PKS 0537-441: A gravitationally lensed blazar?
Stickel, M., Fried, J.W., Kühr, H. L30

The detection of CO in a proto-planetary nebula close to the Galactic center
Mauersberger, R., Henkel, C., Wilson, T.L., Olano, C.A. L34

Unshifted, asymmetric Stokes *V*-profiles: possible solution of a riddle
Grossmann-Doerth, U., Schüssler, M., Solanki, S.K. L37

Cosmology

A determination of q_0 by a technique of null correlation
Bigot, G., Fliche, H.H., Triay, R. 1

(RN) Astrophysical and cosmological solutions in general relativity: a comment on one form of the spherically-symmetric perfect-fluid field equations
Wesson, P.S., Ponce de Leon, J. 7

Two-dimensional nonlinear Schroedinger equation and self-focusing in a two-fluid model of Newtonian cosmological perturbations
Kates, R.E., Kaup, D.J. 9

Cosmological tests of generalized Friedmann models
Linder, E.V. 175

Light propagation in generalized Friedmann universes
Linder, E.V. 190

Isotropy of the microwave background by gravitational lensing
Linder, E.V. 199

Extragalactic astronomy

A method of determining the thickness of spiral galaxies by solution of the three-dimensional Poisson equation
Peng Qiu-he 18

Relative velocities of dumbbell galaxies
Valentijn, E.A., Casertano, S. 27

Star formation and nuclear activity in Seyfert galaxies
Wilson, A.S. 41

A further study of the radio-far-infrared relation in galaxies. II. The ubiquity of the correlation
Wunderlich, E., Klein, U. 47

The extragalactic sky viewed by IRAS
Meurs, E.J.A., Harmon, R.T. 53

Numerical simulations of astrophysical jets: the influence of boundary conditions and grid resolution
Kössl, D., Müller, E. 204

(RN) Supernova rates and bursts of star formation
Richter, O.-G., Rosa, M. 219

The link between IRAS spectra and near-infrared emission features in external galaxies
Désert, F.X., Dennefeld, M. 227

Cygnus A: hot spot spectra and the condition of classical hydrodynamics
Muxlow, T.W.B., Pelletier, G., Roland, J. 237

The occurrence of bulk relativistic motion in compact radio sources
Witzel, A., Schalinski, C.J., Johnston, K.J., Biermann, P.L., Krichbaum, T.P., Hummel, C.A., Eckart, A. 245

Stability of disc galaxies and constraints on their mass-luminosity ratio
Martinet, L. 253

Shock conditions for relativistic MHD jets
Appl, S., Camenzind, M. 258

Galactic structure and dynamics

Orbital stability in rotating triaxial stellar systems
Martinet, L., de Zeeuw, T. 269

Stellar clusters and associations

An empirical approach to the location of the theoretical isochrones in the observational plane
Arribas, S., Martinez Roger, C. 63

Formation, structure and evolution of stars

The absolute magnitudes of the Bp-Ap stars
Mégessier, C. 74

Nonlinear evolution of the dynamical instability in a Keplerian disk; resonant excitation of higher modes
Hanawa, T. 79

The distance to the nebula M 1–78
Puche, D., Zijlstra, A.A., Boettcher, C., Plante, R.L., Wilcots, E.M., Wilkin, F.P., Krause, S., Sergo, S.P., Bierman, G.S., Ge, J., Holliman, J.H., Wu, X., Zhao, J.H. 89

Star formation in Seyfert 2 galaxies and the nuclear origin of the 25 μm emission
Dultzin-Hacyan, D., Moles, M., Masegosa, J. 95

The Mira-type symbiotic star BI Crucis
Rossi, C., Altamore, A., Ferrari-Toniolo, M., Persi, P., Viotti, R. 279

Criteria for OH maser emission from circumstellar envelopes of oxygen-rich Mira-type red giants
Sivagnanam, P., Le Squeren, A.M., Foy, F. 285

Stellar atmospheres

Abundances of light metals and Ni in a sample of disc stars
Abia, C., Rebolo, R., Beckman, J.E., Crivellari, L. 100

Diffuse matter in space (including HII regions and planetary nebulae)

Observations of C_3H_2 in the diffuse interstellar medium
Cox, P., Güsten, R., Henkel, C. 108

Physical conditions around Orion IRc 2 as probed by various masers
Zeng, Q., Lou, G.F. 117

The 680–1050 nm recombination spectrum of hydrogen and helium in the planetary nebula NGC 7027
Péquignot, D., Baluteau, J.-P. 298

The Sun

A statistical analysis of the soft X-ray profiles of solar flares
Pearce, G., Harrison, R.A. 121

Model interpretation of Type III radio burst characteristics. I. Spatial aspects
Reiner, M.J., Stone, R.G. 316

Instability of a prominence supported in a linear force-free field
Démoulin, P., Priest, E.R. 336

The solar system

A CCD observation of the water ion distribution in the coma of comet P/Halley near the Giotto encounter
Ip, W.-H., Spinrad, H., McCarthy, P. 129

Limiting altitude separation in the new Moon's first visibility criterion
Ilyas, M. 133

The anomalous dust tail of comet Kohoutek (1973 XII) near perihelion
Richter, K., Keller, H.U. 136

Optical polarimetry of P/Halley: synthesis of the measurements in the continuum
Dollfus, A., Bastien, P., Le Borgne, J.-F., Levasseur-Regourd, A.C., Mukai, T. 348

Celestial mechanics and astrometry

Planetary orbits in the elliptic restricted problem. I. The α Centauri system
Benest, D. 143

Physical and chemical processes

Polarized radiative transfer in an inhomogeneous source
Björnsson, C.-I. 147

Dust formation in stellar winds. IV. Heteromolecular carbon grain formation and growth
Gail, H.-P., Sedlmayr, E. 153

Particle acceleration at shock waves in the presence of finite amplitude perturbations of magnetic field. I. Parallel shock
Ostrowski, M. 169

A new determination of the Geneva photometric passbands and their absolute calibration
Rufener, F., Nicolet, B. 357

Abstracts of articles which have been published in A. & A. Suppl. Ser. 75, Nos. 1 and 2

Spots on T Tauri stars: the photometric database
Bouvier, J., Bertout, C., Bouchet, P. 375

UBVRI photoelectric photometry of high proper motion stars
Rosselló, G., Figueras, F., Jordi, C., Núñez, J., Paredes, J.M., Sala, F., Torra, J. 375

Walraven *VBLUW* photometry in Basel halo fields. I. Photometric data for Selected Areas SA141 (South Galactic Pole), SA94 and SA107
Pel, J.W., Trefzger, Ch.F., Blaauw, A. 375

Further fast photometric observations of intermediate polar 3A0729+103
Vaidya, J., Agrawal, P.C., Apparao, K.M.V., Manchanda, R.K., Vivekanand Rao, P., Sarma, M.B.K. 376

Atomic partition functions for titanium and vanadium
Halenka, J. 376

Five-colour photometry of EV Lacertae flares
Panov, K.P., Piirola, V., Korhonen, T. 376

A survey of an area around the north ecliptic pole at λ 11 cm wavelength
Loiseau, N., Reich, W., Wielebinski, R., Reich, P., Münch, W. 376

Spectra and radial velocities of white supergiants
Denizman, L., Hack, M. 377

An atlas of synthetic spectra of galaxies
Rocca-Volmerange, B., Guiderdoni, B. 377

Equatorial coordinates of double and multiple star components measured on GPO astrographic plates
Jorissen, A. 377

The velocity field of the outer Galaxy in the southern hemisphere. III. Determination of distances to O, B, and A type stars in the Walraven photometric system
Brand, J., Wouterloot, J.G.A. 378

The shell spectrum of Pleione: radial velocity evolution between 1978 and 1987
Ballereau, D., Chauville, J., Mekkas, A. 378

A homogeneous z-term series of astrometric latitude observations (January 5, 1962–December 31, 1981)
Li, Z.X. 378

Investigations on binaries with more massive invisible components. I. The H-deficient system KS Persei
Margoni, R., Stagni, R., Mammano, A. 379

New double stars (21st series) discovered at Nice (Text in French)
Couteau, P. 379

Duplicity in the solar neighbourhood. V. Spectroscopic orbit for the nearby double-lined solar-type star HR 8581
Duquennoy, A., Mayor, M., Griffin, R.F., Beavers, W.I., Eitter, J.J. 379

CCD identification and classification of 5 GHz radio sources
Fugmann, W., Meisenheimer, K., Röser, H.-J. 380

Classification of a sample of field stars in the direction of the North Galactic Pole by multicolour Vilnius photometry
Smriglio, F., Nandy, K., Boyle, R.P., Straižys, V. 380

A deep, nearly complete, survey of northern high-velocity clouds
Hulsbosch, A.N.M., Wakker, B.P. 380

A bibliographical catalogue of RR Lyrae stars
Heck, A. 381

Position of two southern radiostars obtained with the Danjon astrolabe at Santiago
Noël, F., Débarbat, S. 381

A catalogue of decimetric solar flare radio emission
Güdel, M., Benz, A.O. 381

Search for rapid Hα variability studies in Be stars: 28 Eridani, X Ophiuchi, 66 Ophiuchi and π Aquarii
Ghosh, K.K. 381

Long slit spectroscopy of emission line galaxies. I. The sample
Durret, F., Bergeron, J. 382

Results of observations made in Paris with the astrolabe. Time and latitude 1987
Chollet, F., Darré, Ph., Débarbat, S., Golbasi, O., Lam, S.K., Texier, P., Okten, A. 382

Contribution to the study of composite spectra. IV. Orbital elements of the Am spectroscopic binaries HD 41724-5 and HD 177390-1
Carquillat, J.M., Ginestet, N., Pédoussaut, A. 382

The development and weakening of the shell spectrum of 88 Herculis (1977–1987). I. A radial velocity study
Duemmler, R., Kubicela, A., Doazan, V., Bourdonneau, B., Arsenijevic, J. 383

Millimeter continuum measurements of extragalactic radio sources
Steppe, H., Salter, C.J., Chini, R., Kreysa, E., Brunswig, W., Lobato Pérez, J. 383
